## TREE CARE

### **Protect your beautiful trees and property from Monsoon Storm Damage.**

Monsoon season starts this week. Monsoon season officially starts June 15th and runs through September 30th. Our Monsoon Storm Season is a large-scale weather pattern shift that can bring heavy winds and substantial amounts of rain.

In most cases throughout Anthem and the surrounding communities, many trees have been improperly pruned. These poor pruning practices have created an increased risk for severe limb breakage and/or complete tree collapse.

Protect your trees as well as potential collateral damage from tree failure such as your house, fence, car, neighbor's property, etc.
